

**SKILLS:** JavaScript, Ruby, Rails, Mongo DB, Express, React, Redux, Node JS, CSS3, HTML5, SQL, Docker, GraphQL

## PROJECTS:

**PawSitters** Ruby on Rails, React, HTML, SCSS, CSS, BCrypt, jQuery, PostgreSQL, Heroku, AWS S3

[live](#) | [github](#)

*PawSitters is a full stack clone of Rover that was made in two weeks*

- Employed AWS S3 for database seeding and image hosting
- Leveraged reducers and thunk action creators so users can edit and delete their bookings in real-time without refreshing the page
- Constructed a pixel perfect clone of Rover using SCSS and CSS techniques

**LairBnB** JavaScript, React, Node.js, MongoDB, Express, Heroku, BCrypt, AWS S3, SCSS, CSS, Heroku

[live](#) | [github](#)

*LairBnB is a full stack clone of AirBnB where everyday citizens can rent out lairs from their favorite villains*

- Implemented a user authentication pattern using BCrypt for password hashing
- Designed a search bar that incorporated a Google Map API to dynamically display and render user search input depending on the location they put in
- Utilized Docker to make it deploy and run smoother, drastically improving user experience

**Disinterest** JavaScript, React, Node.js, HTML, SCSS, CSS, MongoDB, Express, GraphQL, AWS S3, Heroku

[live](#) | [github](#)

*Disinterest is a full stack clone of Pinterest where users can view the world's most uninteresting topics*

- Stores image uploads in the cloud using AWS S3, reducing server loading times immensely, allowing the app to scale elegantly
- Designed to ensure that image URLs were being returned to the form using an Axios asynchronous post request and promises
- Incorporated infinite scrolling which helped to increase user performance

## EXPERIENCE:

### Server

*Lazy Dog Restaurant & Bar*

June 2018 - March 2019

- Provided optimal guest experience in a high speed environment by working with coworkers to ensure smooth service of a 250+ seat restaurant
- Helped foster and promote teamwork through effective communication and collaboration
- Managed orders and accompanying financial transactions using digital Point of Sale system
- Memorized over 100 different types of alcohols, and made knowledgeable recommendations on appropriate food and alcohol pairings
- Mentored and trained junior staff on menu knowledge and how to provide quality service

### Sous Chef

*Cin-Cin Wine Bar & Restaurant*

Feb 2016 - Sept 2016

- Oversaw and assisted Executive Chef in managing kitchen staff in all aspects of food production
- Prepared all menu items daily with a team of 7 people serving over 200 guests a night
- Evaluated food products carefully to ensure consistent quality standards
- Maintained and monitored hygiene ensuring that ServeSafe and state regulations were adhered to
- Coordinated with restaurant supervisors on stocks, budget, and kitchen efficiency

## EDUCATION:

AppAcademy - 2019 - Top rated, high quality coding bootcamp

Sacramento City College - 2016-2018
